Replacement waste bin for The Valley.

Following the damage to the waste bin near to the junction of The Valley and Hill Farm; as this particular bin is owned by the Parish Council, it is incumbent on the Parish Council to deal with and remedy the situation.

Given the overall move away from dog waste bins to general waste bins that accept dog waste, the proposal would be to replace damaged bin with the standard waste bin similar to those sited around the Playing Field matching the two others purchased in 2024.

We previously purchased two 112 litre Wybone waste bins which at the time were priced at £314.99 plus added elements like litter and dog waste signage this worked out at £325 per bin plus delivery and VAT and approximately £300 to have them sited, so estimate that would be circa £150. Est total £450 + VAT (which we will recover).

The collection of waste from this site is already paid for as a separate addition to WDC's bin collections in the village.

Will the Parish Council approve the cost to purchase and site the litter bin to replace the broken one in The Valley.
